Step 3 3
Feature Reverse-Engineering 4
Step 4 4
User segmentation 4
Step 5 5
Problem Hypothesis 5

Step 1

Getting started with the Product Analysis - Flows & Frictions

S. No	Flows / Touchpoints	What works well	Confusion / Friction
1	Signup → login	Social login → Fast entry and multiple sign in options	Password rest steps are lengthy
2	Home Screen → Product Search/ Discovery	• Personalised recommendation • Plenty Images and Reviews	• Too many ads • Cluttered product display • Difficulty in comparing products
3	Product Page → Add to cart/Buy Now	• Subscribe & Save • One-Click Checkout • Reviews with Images	• Similar product suggestion with no difference is overwhelming • Cart updates sometimes feel inconsistent
4	Checkout → Payment	• Estimated delivery time visible • Saved Addresses and Payments • 3-step checkout	• Billing Address unclear on 'Buy Now' option • Separate cart grouping for Fresh and Bazaar categories.
5	Order Tracking → Delivery Experience	• Early and One-Day deliveries • Delivery notifications are clear	• Tracking details can be vague • Delayed deliveries without explanation • Difficult to contact delivery partner directly
6	Post Delivery → Product Support	• 24x7 chat and call support • Multiple Payment methods for 'Cash on Delivery'	• Too many support steps before human assistance • Refund timelines unclear sometimes • Delivery of damaged Non-Returnable items. • Delivery timeline mismatching with estimated timelines

Step 2

Company context (Mission, Revenue & Differentiators)

S. No	Field	Context
1	Mission	To make online shopping simple, fast, and reliable so people can buy whatever they need from anywhere without hassle.
2	Revenue streams	Prime memberships, seller commissions, sponsored ads, cloud services (AWS), and services like Kindle, Audible, Prime Video and Amazon Music.
3	User value	• Huge variety of products in one place • Fast delivery with live tracking • Easy returns and refunds • Helpful ratings and reviews before buying • Safe payment methods • Personalized recommendations
4	Business value	• It grows the business by registering conversion of the guest into a platform user. • Sync in with video, music and delivery models leading to conversion into subscription plans for maximum benefits. • Additionally, Amazon has its own brand trust & reliability among its millions of customers.
5	Key Differentiators	1. **Flipkart:** Flipkart is mostly preferred for discounts and budget deals, especially during sales. Amazon stands out because of faster delivery, better customer support, and a wider range of products across categories. 2. **Myntra:** Myntra mainly focuses on fashion and lifestyle shopping. Amazon gives users an all-in-one shopping experience where they can buy fashion, electronics, groceries, home essentials, and more from a single platform. 3. **Ajio**: Ajio is popular for trendy and affordable fashion collections. Amazon differentiates itself with trusted delivery, easier return policies, more brand options, and the added convenience of Prime benefits.

Step 3

Feature Reverse-Engineering

S. No	Feature	Problem it solves	How it works	Why it works
1	Everything in one app	“I don’t want to open different apps for every single thing I need to buy.”	Lets users shop for clothes, electronics, groceries, books, home items, and more from one place.	For Users: Saves time and makes shopping easier. For Business: Users spend more time on the app and are more likely to buy multiple products together.
2	Fast delivery & order tracking	“I hate waiting without knowing when my order will arrive.”	Users can see delivery dates, live tracking updates, and delivery notifications directly in the app.	For Users: Gives peace of mind and makes the process feel reliable. For Business: Fast and transparent delivery builds trust and brings customers back.
3	Easy returns & refunds	“What if I don’t like the product after it arrives?”	Users can return or replace products directly through the app and track their refund status easily.	For Users: Shopping feels less risky and more comfortable. For Business: Smooth return experiences help keep customers loyal.
4	Reviews & ratings	“I’m scared of buying something that turns out to be bad quality.”	Customers can read reviews, see ratings, and check real product photos uploaded by other buyers.	For Users: Makes it easier to decide before spending money. For Business: Good reviews help increase sales and customer confidence.

Step 4

User segmentation

S. No	Primary segment	Sub-segments	Key needs / Use cases	User Problems
1	Regular Online Shoppers	Students, working professionals, families	Buying daily essentials, electronics, fashion, and home products easily from one app	Too many choices, confusion while comparing products, trust issues with quality
2	Budget-conscious Buyers	Deal seekers, sale shoppers	Looking for discounts, offers, affordable products, and festival sales	Card specific discounts, too many ads/sponsored products, difficulty finding best deals
3	Fashion & Lifestyle Shoppers	Young adults, trend-focused users	Buying trendy clothes, shoes, beauty, and accessories online	Size mismatch, products looking different from images, return frustrations
4	Prime & Frequent Users	Frequent shoppers, convenience-focused users	Fast delivery, easy reordering, entertainment benefits, hassle-free shopping	Delayed deliveries in some areas, confusion about Prime eligibility on certain products

Step 5

Problem Hypothesis

Priority	Problem Hypothesis	Why I picked it	Gut confidence
1	After an order goes “Out for Delivery,” users cannot easily see delivery partner details or contact information.	Creates uncertainty and frustration, especially when users need delivery timing updates or coordination.	HIGH
2	Multiple steps are involved in reaching customer support or human assistance.	Users feel frustrated during refunds, cancellations, or	MEDIUM

		delivery issues when quick help is needed.	
3	Same products are listed by multiple sellers, which creates confusion while choosing the right one.	Users spend extra time comparing prices, ratings, and delivery options for the exact same product.	MEDIUM
