Step 1

User Interviews + Surveys

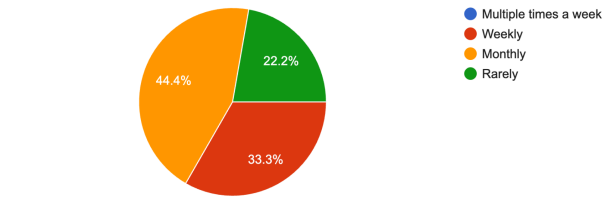

Based on insights from **user interviews and survey responses** across groups, several clear themes emerged.

S. No	Theme	What users asked for	User problem observed	Impact
1	Trust & Credibility	• Authentic reviews • Verified buyer opinions • Helpful review summaries	Users need additional validation before purchasing and cannot fully assess product quality from listings alone.	Reduced confidence may delay or prevent purchases.
2	Moderation Transparency	• Transparent review moderation • Clear handling of fake reviews • Fair seller and reviewer policies	Users may find it difficult to distinguish between genuine and potentially biased or manipulated reviews.	Lower trust in review systems can impact purchase decisions.
3	Content Discovery & Structure	• Better product recommendations • Easier product comparison	Users must evaluate many similar products, making it time-consuming to identify the most suitable option.	Longer decision-making journeys can reduce engagement and conversions.
4	Quality Control	• Accurate product information • High-quality reviews • Reduced misleading listings	Customers often rely more on reviews than product details, suggesting existing information may not be sufficiently clear or actionable.	Increases uncertainty and risk of incorrect purchases.
5	Technical	• Fast app	Frequent shoppers	Performance

	Reliability	performance • Smooth checkout experience	expect frictionless interactions and are less tolerant of delays during discovery or checkout.	issues can directly impact conversion and retention.
6	Entry Friction	• Easy shopping journey • Faster access to products • Reduced unnecessary steps	Users spend significant effort comparing options, reviews, prices, and delivery information before making a purchase.	Higher effort can increase drop-offs and cart abandonment.

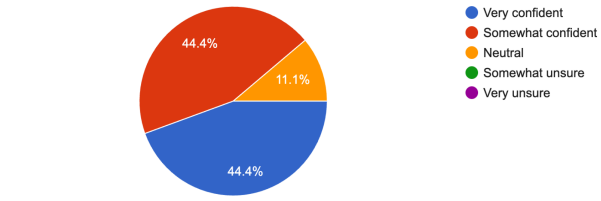

How often do you shop on Amazon?

9 responses

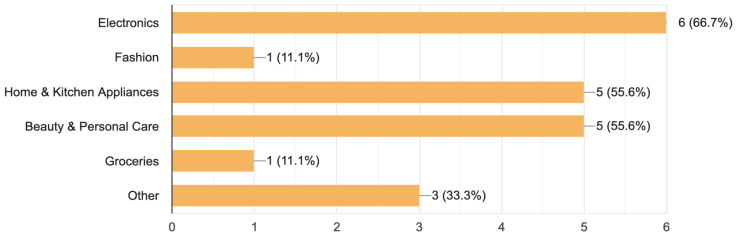

How confident do you usually feel before making a purchase?

9 responses

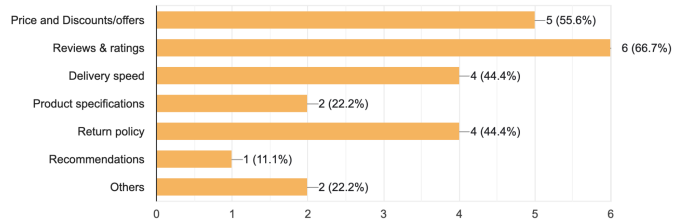

Which categories do you shop for most often? (Select up to 3)

9 responses

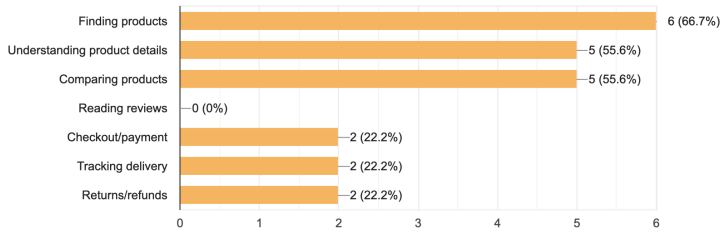

What usually influences your purchase decision the most?

9 responses

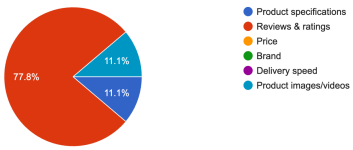

Which part of the shopping journey usually takes the most effort for you?

9 responses

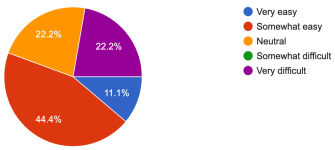

When choosing between similar products, what do you usually rely on most?

9 responses

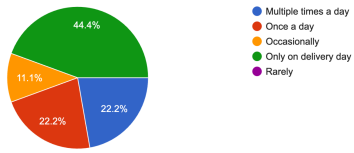

How easy is it to compare similar products on Amazon?

9 responses

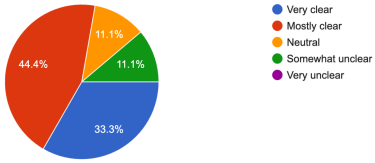

After placing an order, how often do you check delivery updates?

9 responses

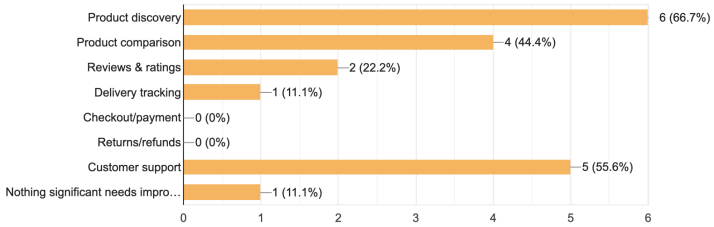

How clear do you generally find delivery updates?

9 responses

If you could improve your Amazon experience, what one thing would it be?

9 responses

Step 2

SWOT Analysis

Strengths	Weaknesses
High purchase confidence among users (89% confident before buying)	Overdependence on reviews and ratings for purchase decisions
Strong customer retention with frequent monthly/weekly shopping	Product information alone is not sufficiently influential
Trusted delivery and return ecosystem supports customer satisfaction	High price sensitivity makes loyalty vulnerable to discounts elsewhere

Opportunities	Threats
AI-powered review summaries and product comparison tools	Fake or misleading reviews can erode customer trust
Personalized deals and recommendations to drive conversions	Competitors offering better prices and promotions
Enhanced shopping assistance for Electronics and other top categories	Increasing use of external platforms for product research

Step 3

Goal setting - Linking User Pain to Business Impact

S. No	User Problem	Leads to User behaviour	Business Impact / Metric affected
1	Users are highly sensitive to pricing, discounts, and offers	Compare prices across competitors before making a purchase	• Reduced customer loyalty • Lower conversion rate
2	Users struggle to determine which product best meets their needs among many similar options	Spend more time comparing products or abandon purchase decisions	• Lower conversion rate • Higher cart abandonment • Longer purchase journey
3	Users rely heavily on reviews and ratings to build purchase confidence	Leave Amazon to check YouTube, Reddit, or external review sites before purchasing	• Reduced session retention • Lower engagement • Delayed conversions
4	Users have limited visibility and certainty about order status after purchase	Repeatedly check tracking updates, contact support, or become anxious about deliveries	• Increased customer support contacts • Lower post-purchase satisfaction (CSAT) • Reduced repeat purchase intent
5	Users are not always shown the most relevant products and deals for their interests	Browse extensively or leave without discovering suitable products	• Lower click-through rate (CTR) • Reduced average order value (AOV)

Step 4

Personas - Bringing Users to Life

Persona 1:

Identity	• Name: Rakshith • Role: IT professional • Age: 26 • Location: Bengaluru • Tagline: “I want confidence that what I order is exactly what I’ll receive.”
Goals	• Make informed purchase decisions • Avoid low-quality or misleading products • Purchase from trusted sellers and brands
Behaviours	• Reads customer reviews before purchasing • Prioritizes products with high ratings and verified reviews • Checks customer photos and recent feedback
Frustrations	• Fake or suspicious reviews • Misleading product images or descriptions • Inconsistent product quality • Difficulty determining which reviews are trustworthy
Quote	“A good review tells me more than a product description ever can.”

Persona 2:

Identity	• Name: Alisha • Role: Software Engineer • Age: 24 • Location: Mysuru • Tagline: “I never buy anything until I'm sure I'm getting the best deal.”
Goals	• Maximize savings on every purchase • Discover the best discounts, cashback,

	and offers • Get the best value for money
Behaviours	• Frequently checks Amazon during sale events • Compares prices across Amazon and competitor platforms • Adds products to Wishlist and waits for price drops
Frustrations	• Missing out on limited-time offers • Difficulty knowing whether a deal is genuinely good • Prices fluctuating frequently • Having to compare multiple sellers and websites manually
Quote	“Why pay full price today when the same product could be cheaper tomorrow?"

Step 5

Problem Prioritization - Choosing P0

Problems identified

1. Users spend significant effort comparing similar products before purchasing.
2. Users rely heavily on reviews and ratings to build purchase confidence.
3. Users are highly sensitive to prices, discounts, and offers.
4. Users lack sufficient visibility into delivery status after purchase.
5. Product recommendations are not always relevant to user needs.

Score with PIF (Population + Intensity + Frequency)

Problem	Population	Intensity	Frequency	PIF score
Too many products to compare	5	5	4	14
Lack of delivery visibility	2	3	3	8

Price comparison effort	4	4	4	12
Personalized recommendations	5	3	4	12
Difficult to trust reviews	3	3	3	9

PO - Users struggle to discover and compare products effectively before purchasing

Problem Statement

Users struggle to efficiently discover relevant products and compare prices, features, ratings, and offers across multiple alternatives, leading to longer decision-making journeys and increasing the likelihood of purchase abandonment.
